Frediction of the coding sequences of unidentified human genes.

XIV. The complete sequences of 100 new cDNA clones from brain which code for large proteins in vitro

DNA Res. 6 (3), 197-205 (1999)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    of the DNA
